High Power - Done for year

Bench Rest - Done for year

-deciding on dates for next year

Christmas - \$10 per Plate

-Daniel Boone Inn
-Dec. 11 at 7:15

Wall Between us and Corson

-Bullet hole in house
-talked to Morgan
-Roofer found bullet in wall
-Vince recommends being proactive
-move steel off bay 2
-6 foot wall over berm
-Shooting into berm between bay 1 & 2 is a bad idea

-Carson wanted to know what we're doing

-seems to be satisfied we are trying to fix problems
-sings for bay 1 & 2 that say no steel
-Investigating options for a wall

- wall on berm between bay 1 and 2
- 6 foot wall
- concerned with wind load on the wall because it's fill
- Could dig into dirt under berm but still makes very tall poles
- Build wall on edge of bay 1
 - 13 feet high -32 feet long
 - covers almost all of house
 - wind speed can reach 90-100 mph
 - wall must withstand high speeds
 - Add wing wall off bench 3 like bay 2
- Bench rest can see window on house
 - Plan for wall
 - 6" I-beam 6 feet deep
 - Stack beams between them
- Must do what a reasonable person would do
 - Possibility of a pored concrete wall
 - Need help pricing job
- Mike T
 - Add mandatory meeting 1 per year
 - Maybe 4 times per year
 - Exec committee work up guidelines
 - Need someone to update website
